**GUARD IT WITH
EAT CLEANER**

WORLD'S ONLY ALL-NATURAL
PATENTED FRESH VEGETABLE AND
FRUITS WASH

Made in USA

EAT CLEANER - SAFER THAN WATER

Eat Cleaner is World's only all-natural patented food wash that removes all these toxins in 2 minutes. It is tasteless, odorless and more effective than water to wash veggies and fruits.

- Removes 99% of surface pesticides
- Washes 99.9% of bacteria
- Extends produce shelf life upto 200%

METHOD OF USE:

Spray:
Spray Eat Cleaner on Veggies and Fruits. Leave for 2 minutes.

Wash:
Wash them with clean water and enjoy!

REMOVES
PESTICIDES
99.9%

NATURAL BLEND OF PLANT-BASED INGREDIENTS TO PAMPER YOUR BABY'S HEALTH

- Natural Citric Acid from Fruits and Vegetables
- Sodium Citrate, a Citric Acid Salt
- Decyl Glucoside, a plant-based surfactant
- Sea Salt, Anti-bacterial Natural preservative
- Vegetable Glycerin
- Calcium Ascorbate, Anti-oxidant to prolong shelf life

BENEFITS

- Simple to use and carry
- Removes coated wax
- Washes pesticides
- Kills 99.9 germs
- Increases produce life
- Gluten-free & Vegan
- Money saver
- Tastier Fruits and Veggies

EAT CLEANER HELPS MORE TO EVERYBODY

- Remove coated wax, pesticides, germs from fresh produce
- To clean kitchen utensils and cutting-boards
- To increase fresh produce storage life
- To prevent browning of apple slices, potatoes, eggplants etc.
- To wipe hands and face
- To preserve flowers before events
- To clean baby binkies and toys that contacts with their mouth
- To clean refrigerator inside
- To remove sticky residues
- To wash shower scaling

OUR PRIORITY

About The Group

Kataria Group, established in the year 1971, has reserved an enviable position among the top rated industries in steel wire production. A niche group as a hallmark of Trust and Quality is backed up by years of experience in steel wire, conductors and cables manufacturing and marketing. With the staggering capacity of 1, 00, 000 MT of steel wire production per annum the group has been winning accolades and recognition for more than three decades.

Kataria Group has etched its name as a premium enterprise in industrial agricultural and domestic power & infrastructure sector as a reliable supplier. KIPL has sophisticated state-of-the-art plant in Ratlam (M.P.) equipped with latest machinery with a total manufacturing plant area spreads over a million sq. ft. Kataria Group comprehensively follows the clean Business Ethics in conducting its Business and shows considerable inclination towards empowering society as well as environment. High technological expertise and fiscal strength has placed the group in favourable position to meet the needs of its customers.

**Let the
power of data
drive your
business growth**

Embrace the future of
Digital technology

The unrealized potential of data, the new oil

Quite ironically, our connected world has yet to achieve the optimal seamless connectivity among the sources of data. This creates various pockets of data and information that are inaccessible to other business functions in a timely and efficient manner. These data silos prevent businesses from getting a

complete picture, and force the reworking of the wheel, thus making the entire value chain highly inefficient and time consuming. Not to mention, the decisions taken based on incomplete picture often does not have the intended impact on business.

Data Sources in Silos

- Deal Source & Diligence
- Valuation & Pricing
- Portfolio Performance Measurement
- Reporting
- Investor Management
- Asset Analysis
- Risk Analysis
- Compliance & Regulatory Requirements

For every deal, an asset manager has probably analyzed over 50 deals. So in a mid-size portfolio of 300 deals, the manager may have analyzed well over 15,000 assets. Today's technology cannot use this huge data for future references, which is a significant waste of precious information.

Pulak Sinha • Co-Founder and CEO, Pepper

Disruptive forces are good. They entail transformation.

Disruptive Forces

Fund Structures becoming more complex

- a. Making it increasingly difficult to manage everything on excel/spreadsheet
- b. Pushes the industry towards automated, efficient, connected solutions

Investors becoming more demanding

- a. Investors have exited repeated funds after non-performance
- b. Making a case for in-depth research, rapid scale up, agile decision making, and efficient execution

Regulatory environment becoming more arduous

- a. With a well-intentioned purpose of preventing the repeat of crisis
- b. Significantly increasing operational overhead and pushing the industry towards efficiency

The rapidly evolving digital technology

- a. Helping introduce efficiency and convenience to the existing functions in the asset management industry
- b. Pushing solution architects to design innovative solutions for the future

Because Investors want to know the stories their investments are telling

Industry's most comprehensive digital investor management solution

Investor Management

Thanks to our continual engagement with investors and clients, we understand that they are no longer interested in mere data repositories. They want their systems to tell them the stories that the underlying data is telling. So Pepper has transformed the output from tabular data to visual representations, that tell better stories.

With Pepper, fund managers can now access their enterprise data on mobile. So they can work from anywhere with a product that is faster, smarter and more scalable, thus increasing their own efficiency.

Azure allows Pepper to store data in the home country in compliance with the local statutory laws. Pepper extends this flexibility to the investors.

Because quarters are profitable, if day-to-day operations are efficient.

20 Most Promising Azure Solution Providers CIO Review 2016

By automating almost every task, Pepper introduced over 70% time-efficiency, thus producing month-end report in less than half-a-day.

Operations & Technology

The alternative asset management industry has historically been averse to technology. Pepper, on the other hand, is embracing the digital technology. We are committed to being a pioneer in transforming the finance industry by providing previously unavailable, fully integrated, best-in-class solutions covering all the traditional operational activities of a fund management business, such as Risk Reporting,

Valuation & Liquidity Management, and Accounting & Regulatory Reporting. Pepper's product leverages all the technological advancements of the digital space, and provides the customer with a design that is modular, secure, and API based, which adds a different level of scalability and flexibility to the product.

SWITCH THE
'TOUCH'

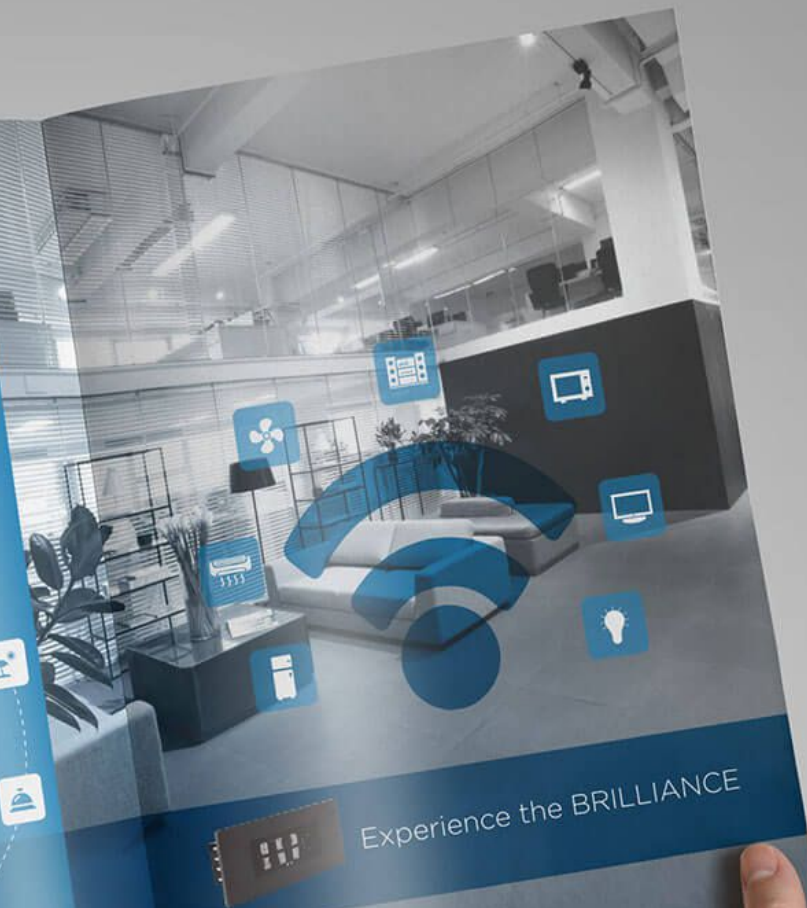

www.scop

SCOPO ASPIRES TO TOUCH YOUR LIFE WITH A SHADE OF MODERNITY.

"Touchit" Switches- new dawn in the era of technology has modernized the touch experience. A smooth-satin touch that tenderly pleases your finger or a smart operation of any electronic system from anywhere controlled through app or a remote control, will leave you spellbound!

"Touchit" switches alter the way you live each day with its simple mechanism and innovative technology. Distance is a mere illusion, when with the tactile sensor you can control and command all devices in your hand. Embodying the policy of excellence, you can customize "Touchit" switches to match up with your home decor. Taking a notch up, you can use Wi-Fi control to manage all connected devices.

Experience the BRILLIANCE

SCOPO SIMPLICITY RE-DEFINED

SCOPO, redefines elegance and raises the bar of living standards through its modular switches. SCOPO is well-acclaimed for its in-depth expertise and vast experience with embedded systems and development.

"Touchit", the smart switching system manage all connected devices through Wi-Fi mobile controls. Aesthetically designed, it's leading edge technology allows the user to either manually operate it or through a remote control. It is a bliss for aged people who find it strenuous to get up and on/off the switch every single time.

Now, sitting afar, you can switch on the light, fan or air-conditioner just with a single tap on your device using your mobile phone.

Wondering how
SCOPO will
Change your Life?
Here's how...

Mobile Application for Easy Access
Download the SCOPO application that gives you easy access to the entire switching system installed at your premises. It lets you efficiently manage electronic devices, without budging a bit from your place.

Smooth one touch On/Off operation
Treat your fingers with the glossy-leather touch of the digital switches. Just a single touch, without any sort of efforts simplifies your life.

Water tolerance in foggy environment
Completely shock proof and safe to use, when the climate is enveloped in fog. Put your worries to rest, let your child use the switches freely.

Beautiful appearance to match with your interior
No matter how uniquely designed is your interior, we will customize the switches in coherence with your ambience, so as to deliver an enchanting look. Switches can also be customized for graphic designs to blend in easily with the look of the interior.

LED indicator for easy identification in day and night time
Equipped with LED, Touchit switches are easy to operate in the bleakness of night, just the way you operate during the day time.

Easy to clean and maintain
Touchit switches do not require much of maintenance, they do not get shabby fast, hence they are easy to clean too. Their striking look says it all.

User can install in existing wiring too, no separate wiring required
You will not have to upset your present wiring and the pleasing look of your abode to install Touchit switches. You can easily install them in the existing wiring without any need for separate wiring.

No mechanical wear & tear as compared to normal switches
Forget the loose wire connections and faulty fixtures. With Touchit switches, you will not have to spend any extra penny in its maintenance, after once they are installed.

Shock proof switching
Normally you are afraid of your child getting electrocuted while operating switches, but with Touchit switches, there is no such fear, as they are shock proof. So, let your child have the complete fun.

Zaika sehat ka!

**SPOONFUL
OF GHEE
TO SERVE YOUR
TASTE BUDS**

Embrace the Goodness of Ghee for a Younger You!

Have you ever wondered how your supermom juggles between work and family and yet able to wear a smile all the time? Her recipe to healthy glow is a dollop of ghee in dal-chawal, that is not just delectable to taste-buds but also her secret to vitality. She follows the Indian food wisdom dating back 5000 years which got drowned in the fuss of fad diet claiming ghee as fattening.

Shripal ghee endeavored to revive the age old recipe of churning out the amrit-ghee from fresh cow milk, and delivering it to every Indian household while maintaining the highest standard of packaging. A dash of Shripal ghee on your modak or puran-poli, while exuding the delicious aroma enhances the flavor of these delicacies. Both, hygienic and ethical practice of rearing the cattle are employed while producing ghee. Relish the goodness of Shripal ghee- a perfect blend of purity and taste.

Improving Driver Behavior

Other major contributors to high fleet costs are unauthorized vehicle usage and improper driver behavior. GPS vehicle tracking solutions can offer the

user a variety of information regarding driving behavior including speed, engine start-up and shut-down times

SML ISUZU

Alerts	Vehicle	Driver	Speed	Location	Time
Speeding	ISUZU ELANZA	John Doe	120 km/h	1234 Main St, City	10:15 AM
Speeding	ISUZU ELANZA	John Doe	110 km/h	5678 Main St, City	11:30 AM
Speeding	ISUZU ELANZA	John Doe	100 km/h	9012 Main St, City	12:45 PM
Speeding	ISUZU ELANZA	John Doe	90 km/h	3456 Main St, City	1:00 PM
Speeding	ISUZU ELANZA	John Doe	80 km/h	7890 Main St, City	2:15 PM

Using Reports and Alerts

SML telematics solution allows you to automate concise and easy-to-understand reports on a weekly or monthly basis. In addition, you have the ability to generate reports instantly. The data can be organized to give you information about daily vehicle or driver activity, speeding violations, violations of excessive idling times and much more.

Alerting features can easily notify you of unwanted behavior. Alerts can also be triggered for excessive speeding and idling, engine start-up or shut-down times, after-hours unauthorized vehicle usage and the moments vehicle enters or exits specific locations.

SML ISUZU

Key Features :

Real time vehicle location

SML fleet picks vehicle location at specified interval and lets you know vehicle behavior along with location over map.

Dashboard Analytics

Users can see vehicle details along with features like Group, current vehicle status, speed, location, total KM run in a day, view map and SOS feature.

SOS feature

Unique feature where user can ask for help if there is vehicle breakdown from nearest SML service location.

Live tab

Number of vehicles can be seen in cluster over map. Vehicle groups can be seen with critical alerts.

Alert tab

Exception alerts like over speeding, harsh break, harsh acceleration, GTC, vehicle battery health, idle time, etc. can be seen. It informs you about stops made or driving pattern which can help in longevity of vehicles on road.

Report

Vehicle behavior over road can be fetched through report tab. It gives you trip by trip analysis with all details you need.

TIPPER TRUCK

An ideal choice for loading and unloading of construction site material like sand, gravel, bricks and waste collection & disposal as well. With the 40 degree tipping angle, the tipper truck also has a sturdy design as it comes with efficient unloading mechanism ensuring zero waste in the entire process. This tipper has the capacity to carry 70 CFT to 140 CFT of load. Also, it features a telescopic cylinder for hydraulic lifting. This system to make the dumping mechanism easier that requires minimal manual intervention.

APPLICATIONS

Bricks

Sand & gravel

Waste

Building material

FEATURES

It comes in a range of 70 CFT-165 CFT load carrying capacity

Comes with both Fixed / Drop side deck options

Fully Built-up tipper with WIPRO Under body tipping system

High quality polyurethane paint used

Available in Single / Twin jack hydraulic system

OFFLOAD YOUR BURDEN THE EASY WAY

The rugged body ensures that the tipper can operate smoothly in adverse road conditions. Hence, all the requisite safety standards are incorporated in this vehicle. Along with transporting your material safely and rapidly, there are inbuilt features like brake during the process driving a smooth experience for drivers. Hence, with this tipper truck, you can reliably send material to their respective locations, without getting lost in the transit.

UNCLUTTERS THE CLUTTER, THE BRILLIANT WAY

HOOK LOADER

The hook loader is a mechanism that simplifies the entire process of waste management, in a way supporting the growth of waste management by efficiently lifting the waste containers containing the garbage and placing them in a proper site. Hook loaders are designed for movable containers. They are designed to be placed at different locations and are used to lift the waste bins placed at different locations. The hook loader is then taken to the place where the waste is to be disposed. The functional design of the hook loader provides easy service and low maintenance.

This ensures high value retention and low operation cost, under safe conditions.

Suitable Hook loader is an efficient and safe roll on system which can lift the container on the truck and then get the container securely locked with the help of a hook and transported. On the unloading point, the container can either be slid down to the ground or on another trailer or can tip out all the material inside the container. The truck boasts of an excellent functional design ensuring the smooth flow of work.

Garbage collection at residential & commercial places

Efficient for Waste Management

Collects both Wet and Dry Garbage

Efficient for Waste Management

Garbage loading & disposal without human intervention

Environment-friendly closed container

Hydraulic container locking system

Safe and easy to operate

Container capacity is 6 cubic meters

Maximum load lifting & dumping capacity is 3 tons

*Delicious
Taste,
that win
Hearts!*

PREMIUM GHEE

UNLOCKING THE SECRET, FOR A HEALTHIER 'YOU'!

Since ancient times, ghee has enjoyed a prominent position in preparation of Indian cuisines. A spoonful of ghee to the plate of steaming hot rice or dal, not just pleases your taste buds, but it is deemed as one of the wholesome meal, nourishing your mind, body and soul.

Sukun Ghee churns out the super food ghee from fresh cow milk, whose rich aroma awakens the appetite. According to the modern dietary guidelines, ghee is one of the most important ingredients that promotes healthy digestion and helps one remain in shape. Sukun takes utmost care in packaging, maintaining the highest standards. Whether its your aloo-paratha or palak paneer, flavor it up with Sukun ghee, that is sure to make the dish more delicious. Delight in the goodness of Sukun ghee, and be healthy and young forever!

**EVOLVE
EXPAND
EMPOWER**
through Engineering

ONE STEP AHEAD

United Systems is driven by strategies of experienced professionals in the field of Industrial Project Execution, from Concept to Commissioning.

Established in 2010, We are an Engineering, Procurement, and Construction company in the field of Power, Oil and other Process Industries. We specialise in various turnkey packages and have earned a reputation as industry experts through our unwavering commitment and exemplary project executions.

We believe our teamwork is our strength and our people our USP. That's why, we are led by seasoned industry professionals and driven by an engineering and CAD division proven in handling a wide range of products and services. Our workforce is trained and equipped to handle structural, mechanical, electrical and instrumentation functions besides having a strong foundation on Project and Construction management as part of the EPC set-up.

VISION

that directs
towards Victories

We aspire to be a global benchmark for Engineering, Construction and Project management by creating value for our customers and by providing enriching and satisfying careers for our people.

MISSION

Moving with Precision
Delivering Value
Preserving Reliance

We make a difference through:

Our People

Strive hard to provide an equal platform that fosters teamwork, enhances leadership, nurtures talent and rewards hard work for every employee.

Our Conduct

To provide a safe, environment friendly work place that cares for our community and demonstrates highest of ethical standards.

Our Approach

To be the EPC contractor of choice through constant endeavour to

achieve extraordinary levels of customer satisfaction by delivering leading-edge, economical and seamless products and services.

Our Relationships

To build positive, long-term relationships that are built on honesty, trust, and respect.

Our Culture

To be an equal opportunity provider by building a diverse and collaborative work environment where openness and transparency is welcomed.

CCD Investments has a strong track record as a pioneer in creative financing and investments in creative markets. The company prides itself for its focus on innovative and sustainable approach to its investments – making it the preferred partner to local communities and governments alike. Experience gained from projects around the world allows CCD INVESTMENTS to develop frameworks tailored to the local context. At the heart of our business decision is the local communities we work with. The company strives to improve local communities' livelihood and create opportunities which allows them to share in our success.

Where you ink your Story

Yours is a world of magnificent colours strewn over diverse landscapes of myriad shapes that are built on the foundation of our vibrant earth. Ours is a world that reflects yours, and sometimes betters it, but is built on the foundation of spotless white. We are quite literally the blank paper on which you ink your story.

TECHNOLOGY & SERVICES

FLOWMETER

Positive Displacement Flowmeter

Oval Gear Type PD Flowmeter

Line Size : DN 64 to DN 100
Flow Range : 0.5 LPH to 90000 LPH
High Accuracy & repeatability
No Requirement of Flow Conditioning & Bi-directional flow
Intrinsically safe & flameproof model available
Quadrature pulse output Option
Application : Fuel Oils, Diesel, Solvents, Paints, Adhesives, Resins, DM water, Chemicals etc.

Piston Type PD Flowmeter

Line Size : DN 15 to DN 50
Flow Range : 0.2 to 330 LPH
High Accuracy & repeatability
Most Suitable for High Pressure & High Viscous Liquids
No Requirement of Flow Conditioning & Bi-directional flow
Intrinsically safe & flameproof model available
Quadrature pulse output Option
Application : Fuel Oils, Diesel, Solvents, Paints, Adhesives, Resins, DM water, Chemicals etc.

Dual Pulse Type Insertion Paddle Wheel Flowmeter

Line Size : DN 40 to DN 2500
Velocity Range : 0.3 to 10 m/s
Accuracy : $\pm 1.5\%$ of reading
Application : Water, Fuels & other low viscosity liquids.
Features : Low Cost of Ownership & wide flow range
Bi-directional flow measurement

for temperature sensing
of electrical rotary
machines

techno
controls

Bearing Temperature Detectors

www.technocontrols.com

Bearing Temperature Detectors

Product Overview

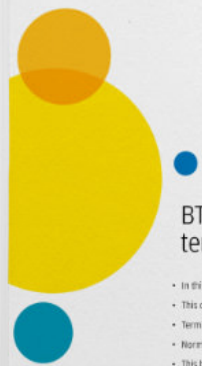

BTDS are bearing temperature detectors. Bearing temperature detectors are installed in stationary bearing casing and monitors bearing temperature. Bearing temperature is an important parameter of heavy rotary machines and it indicates bearing health in rotating equipment. Rise in bearing temperature suggest possibilities of problem in oil film or alignment of machine. BTDS give early detection of bearing problems and it prevents further damage of machine. The measuring elements are located in proximity of tip in order to measure correct reading.

Construction

BTDS are just like normal temperature sensors, however they are designed to work in applications where fast response and vibration immunity is required. They are often used in spring loaded design for firm contact and vibration immunity. Because of relatively low temperature range, RTDs are used as measuring element in BTDS. However in certain application various kind of thermocouples are also used. Techno offers various designs of BTDS that suits customer requirement. Techno offers various elements like Pt100, PT1000, P50, Ni 1000 etc. Techno also offers various kinds of thermocouples. This sensor is specially designed to suit this application. Just like other temperature sensors they are custom made according to the requirement. Almost all designs are available in single element or dual element. In case of RTD element, we offer 2/3/4 wire per element, as per customer requirement. There are certain standard designs which are used for this kind of applications.

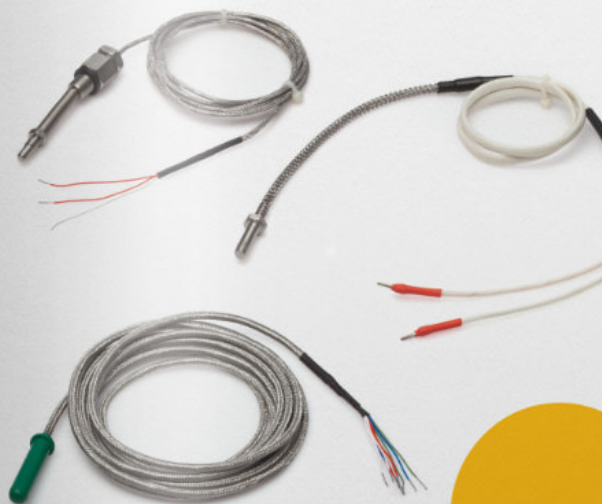

1. BTDS with bayonet
2. BTDS with extension cables.
3. BTDS with terminal heads
4. Specially designed BTDS

- Certain design of BTDS will be available very soon with ATEX and IECEx certification.

BTDs with terminal head

- In this kind of design, terminal head is provided to connect signal cable with sensor.
- This design is suitable when termination of signal cable is far from sensor.
- Terminal heads are available in various material like aluminum, nylon or SS.
- Normally, mounting of terminal is on spring loaded assembly.
- This head are available with ingress protection certificates.
- There are several options like number of cable entries, cable entry size etc.
- Movable or fix (welded fittings) of required size can be provided.
- Also, we also provide insulating sleeve on sheath if required.

BTDs - Special design

As the name suggest, we offer special designed BTDs.

This designs includes various options like

- (1) 100% electrical insulated
- (2) BTDs with various connectors
- (3) BTDs with special mounting arrangements

This design are truly customized and available in various designs.

We also execute development orders for BTDs which are not mentioned in our standard product list.
